Creating Self and Peer Assessments

1. Enter the content area, choose Assessments, then select Self and Peer Assessment.

2. Create the name of the assessment (this also creates a column in the Grade Center). Include instructions to guide students.

3. Set the dates for students to submit their work. This is what their peers will evaluate.
Creating Self and Peer Assessments

4 Set the dates for students to evaluate each other’s work.

5 Determine if evaluations are anonymous, set self evaluation options, and specify the number of peers students will evaluate.

Blackboard automatically randomizes peer evaluations.
6 Use Create Question to provide a space for students to submit their work for evaluation.

7 Enter the question text and provide a model for appropriate responses (not required).
Creating Self and Peer Assessments

8 Use the item option to create criteria for each question.

Criteria allows reviews to assign points and provide constructive feedback.

9 Choose Create Criteria to provide evaluation guidelines or choose Word Count Criteria.
10. Provide guidelines for students for evaluating their peers.

11. Set the number of points students can give their peers and provide a space for students to provide feedback.
To view submissions and evaluations, go to the Control Panel, choose Course Tools, and click on Self and Peer Assessment.

Use the options menu to view student work and evaluations.

View Results allows you to send peer scoring to the Grade Center.
