Embedding YouTube Videos in Blackboard

1. Click the Share button underneath your video in YouTube.

2. Click Embed.

3. Choose the display size for your video (at least 640 x 480 is recommended).

4. Copy the Embed code.
5. Navigate to your course in Blackboard. Click the Build Content button and select to add a Web Link.

6. Give the link a name. Then, scroll down to the text editor for the description and click on the HTML button to switch to HTML mode (shown below).

7. Paste your embed code into the text box and click “Update.”

8. Navigate back to your video in YouTube and click to “Share this video.” This will allow you to copy the URL for the video.
9. Paste this link into the URL textbox in Blackboard and then click the Submit button.

When finished, students will be able to either watch the video embedded in Blackboard, or watch it via a web or mobile browser by clicking on the name of the video which is a direct link.
